

Cyber Security

Online Certificate Program

Corporations and government agencies have been put on alert to heighten their infrastructure and data security due to threats from hackers and cyber-terrorists. Gain the skills you need to succeed in this rapidly expanding, dynamic field. Develop a comprehensive understanding of the principles for designing, engineering, and managing secure information systems environments. This program will help prepare you to sit for the Certified Information Systems Security Professional (CISSP®) exam administered by the International Information Systems Security Certification Consortium, Inc., (ISC)²®.

LEARN HOW TO:

- Develop key knowledge of cyber security, including access control, administration, audit and monitoring, risk, response, and recovery
- Implement government and customer imposed security requirements
- Develop best practices for business continuity planning in the event of a major disaster or major change in the business
- Broaden your knowledge to include the implementation of multiple technologies, including client/server, Web, mainframe, and wireless
- Design, diagnose, implement, manage, and resolve complex computer security threats
- Gain the knowledge required to obtain your CISSP® certification
