Osher Lifelong Learning Institute at UC Irvine

In 1997, a small group of mature learners, under the leadership of Rose Moldave, Rayna Zeidenberg, and the late Joan Schwartz and Sally Schwartz, collaborated with the University of California, Irvine, to form the Academy of Lifelong Learning. Six years later, with an initial grant from the Osher Foundation, the Academy became part of the growing Osher Lifelong Learning network. In 2006, the Foundation presented an endowment to the university on our behalf.

Our Mission Statement
OLLI at UC Irvine seeks to enhance the quality of life for mature adults by promoting intellectual growth in a center for senior learning. In collaboration with the University of California, Irvine, we provide unique educational experiences in an environment of social interaction.

JFK’S ENIGMATIC ASSASSINATION
AH 110

The assassination of President Kennedy continues to mystify and fascinate the public. We will explore the way the enigmatic nature of this event has transformed it into something of a literary event. What does fiction have to say about this historical episode? How might fiction be an appropriate response to unanswered questions that hover around the Kennedy assassination? We will discuss not only fiction about the assassination, but also fiction that even seems to foreshadow the event.

**SPELL CHECK WON’T SAVE YOU! AH 111**

We all want to communicate clearly and effectively in writing and in speech, but we can’t rely on Microsoft Word to be our copy editor. Expect: grammar trivia, puns and fun. Don’t expect: a nap.

WHYS IN BIOMEDICAL SCIENCE: An Incursion into Lifelong Questions SC 209
All our life we are asking the question why, seeking an explanation to events and phenomena occurring around us. This new course is aimed at an audience interested in acquiring some answers to why's in biomedical science, such as why our body behaves in a certain way, why we are all different, or why we get sick while others might not. In two sessions, we will have a frank discussion, followed by short lectures, if necessary. These will be open and stimulating discussions, without bias, in a tolerant and objective manner.

ENHANCING YOUR MIND AS AN AGING ADULT SC 210
Improving cognitive abilities over the long term as adults may be accomplished by employing six critical aspects of learning, which are typical of the infant learning environment. A decline in cognitive abilities may be partially due to environments during adulthood that are not as conducive to learning, whereas a lifetime of learning in a supportive environment may expand cognitive functioning in older adults.

Presenter: Professor Rachel Wu, Ph.D., UC Riverside,
is a developmental cognitive neuroscientist who specializes in optimizing the learning environment for infants and adults. Her research across the lifespan has revealed methods which adults may employ based on lessons learned from infancy.

PERSONALIZED MEDICINE: Major Changes in Medical Practice SC 212
This class will explore how every individual's DNA contains variations that can be related to the risk of both rare and common diseases. Genetic testing information can be used to quantify disease risk and optimize treatment in individual patients. Cancer cell DNA is a mutant variation of healthy cell DNA. Mutations in general can cause disease and research suggests that in the future, genomic editing could be used to cure rare disorders.

THE CAESARS MIGHT AND MADNESS

Continuing the Saga

SS 306

Caracalla, 211 to 217 AD, ascended the throne as co-emperor with his brother Geta. His legacy was mixed with the baths to be seen in Rome today and a penchant for cruelty, including the murder of his brother. Following his reign came Constantine the Great, the first Roman emperor to accept Christianity as his personal religion. Recognizing the poor strategic position of the city, he founded the New Rome known as Constantinople.

POLITICS AND RELIGION
What Does Secularism Mean Today?
SS 314
Secularism involves rejection of theocracy, separation of church and state, and protection of religious freedom. Interpretation of these principles varies greatly among democracies. France, for instance, prohibits public Islamic face coverings; in the U.S. such a ban would not be possible. The course will discuss the history of secularism, and then compare France, the U.S., Canada, India, and the U.K. in terms of controversies that secularism has aroused, such as school prayers or baking cakes for gay weddings.

Presenter: Professor Simone Chambers teaches democratic theory, secularism, and civility in UCI’s Political Science Department. Her Ph.D. is from Columbia and she formerly taught at the University of Toronto.
