

# Transformation and the Future of Internet Enriched Higher Education

**Gary W. Matkin, Ph.D.**

Dean, Continuing Education  
University of California, Irvine

# Organization

---

My presentation will...

- Review the history of innovation in education
- Make the case that new technologies are truly transforming education
- Identify and predict the effects of emerging technologies

# Technology *Predictions* ?

---

## ■ Historical examples...

- Radio would eliminate newspapers and transform education
- Television would eliminate motion pictures and transform education
- “I think there is a world market for maybe five computers.” *Thomas Watson Sr. President of IBM, 1943*

## ■ Current examples...

- Online instruction will eliminate professors and transform education
- MIT's OCW will eliminate universities and transform education

# Why is Internet Technology Truly Transformative?

---

Changing teaching and learning practices

- Wide spread, steadily growing adoption with consequent influence on mental structures

# Why is Internet Technology Truly Transformative?

---

## Context of Learning and Teaching

- Immediate resource presentation
- Widely available learning assets (for teachers and students) <http://www.hippocampus.org/>
- Overriding importance of context and instructional design

# Why is Internet Technology Truly Transformative?

---

Changes in educational distribution

- OCW (MIT)
- OCW Consortium

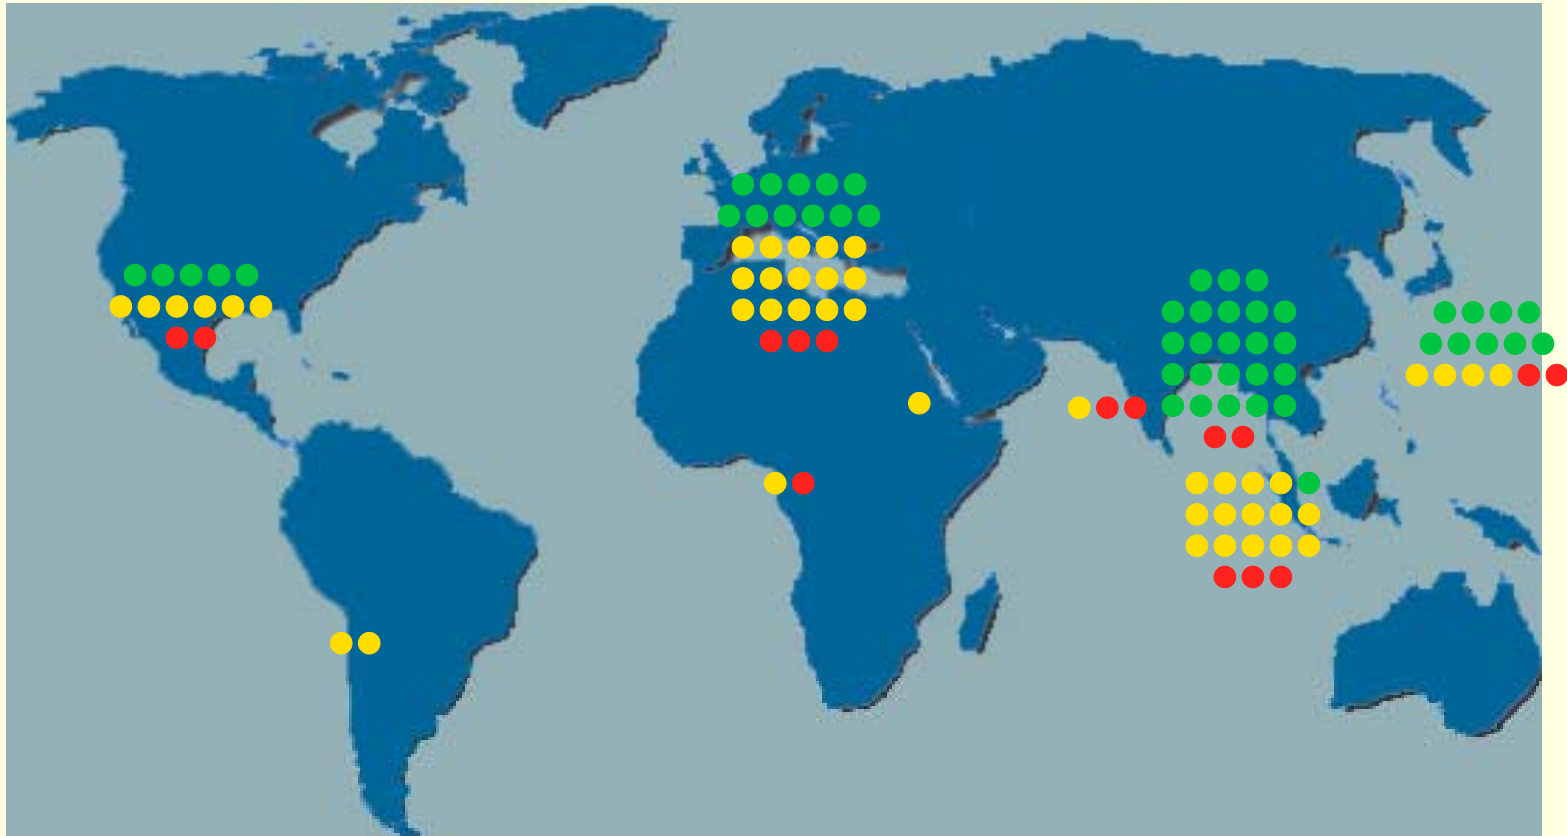

# Impact of OCW @ MIT

---

- 1,550 course available
- 61% of OCW traffic is non-US...
  - East Asia-22%
  - Western Europe-15%
  - South Asia-6%,
  - Latin America-5%,
  - Other regions-13%
- 49% of visitors are self learners, 32% students, 16% educators
- 95% of users report MIT OCW has or will help them to be more productive and effective

*Source: MIT OCW Website*

# Growth of OCW Consortium

- 49 schools live
- 44 in progress
- 15 affiliates
- 108 total

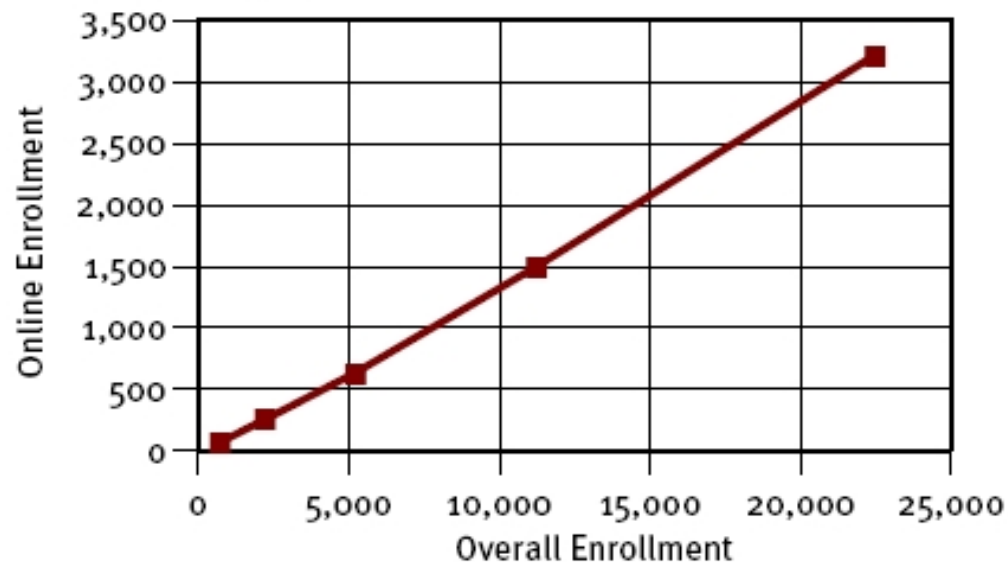

# Courses from MIT and Others

# Online Today...

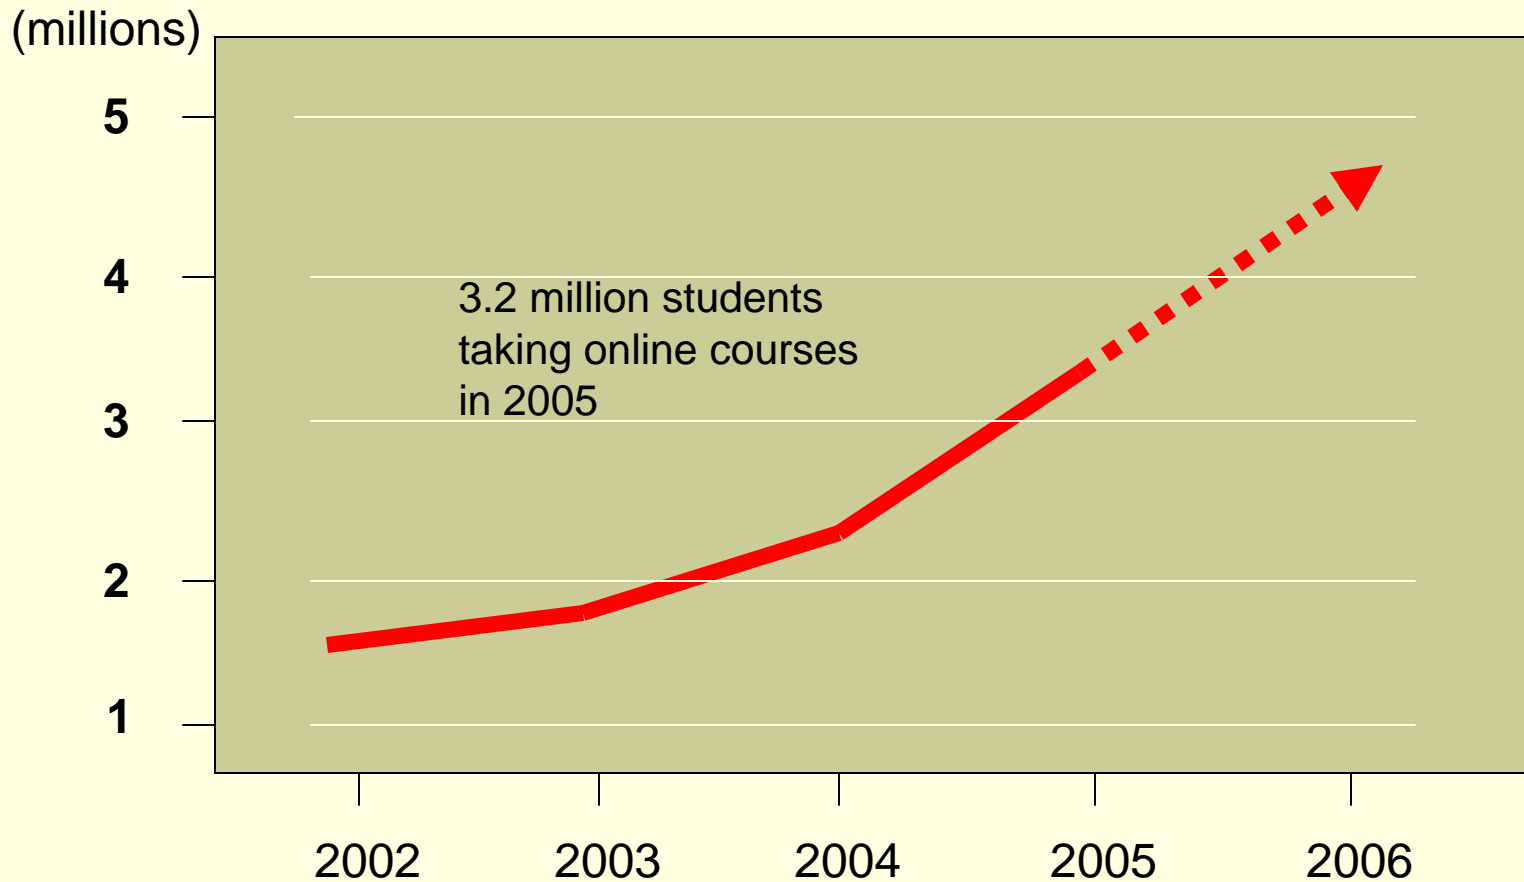

- 3.2 million students taking at least one online course in fall 2005 -up from 2.3 million in 2004

*MEAN UNDERGRADUATE ONLINE ENROLLMENT BY SIZE OF INSTITUTION - FALL 2005*

- 2/3 of the largest higher education institutions offer fully online programs

# Growth of Online Enrolments

# Libraries too have changed...

# Emerging Technologies

---

- User Created Content
- Social Networking
- Mobile Phones
- Virtual Worlds
- Emerging Forms of Publication
- Multiplayer Educational Gaming

# TOMORROW (1 year or less)

---

- User-Created Content

<http://weblogs.elearning.ubc.ca/textologies/links.html>

- Social Networking

<http://www.ratemyprofessors.com>

# A Virtual Keyboard for Adult Fingers!

---

# *Second Life*

<http://www.secondlife.com>

---

*Second Life*, a virtual world, currently has over 100 educational institutions with virtual presence, including Harvard and Stanford.

*Second Life* provides students an opportunity to use simulation in a safe environment to enhance experiential learning, allowing individuals to practice skills, try new ideas, and learn from their mistakes safely and without impacting life work projects.

<http://www.youtube.com/watch?v=JS2JT9IV3CM>

# Video Games

Video games have tremendous potential for creating learning opportunities. A recent UK study from Teachers Evaluating Educational Multimedia has shown that simulation and adventure games - such as *Sim City* and *RollerCoaster Tycoon*, can help develop children's strategic thinking and planning skills.

# Video Games

Currently, Starbucks and the environmental organization, Global Green USA has created an online video game, “*Planet Green Game*”, to show players ways to combat global warming and influence legislators to take action against global warming.

## POP QUIZ!

Evergreen High School needs to be turned into a green school. You will be given 5 questions. Answer each question as quickly as possible for the best score. The wrong answers will fade away revealing the correct answer. Each correct answer will add a green feature to the school.

# TOMORROW (2-3 years)

---

- Mobile Phones

<http://my.hamilton.edu/magazine/2005/spring-summer/vidblinks.html>

- Virtual Worlds

<http://muppets.rit.edu>

**MUPPETS**

multi-user programming pedagogy for  
enhancing traditional study

# TOMORROW (4-5 years)

---

- New Scholarship and Emerging Forms of Publication

<http://www.plos.org> (Public Library of Science)

- Massively Multiplayer Educational Gaming

<http://www.gridtoday.com/grid/944856.html>

The logo for GRID today features the word "GRID" in a large, bold, black serif font. Below it, the word "today" is written in a smaller, yellow, lowercase sans-serif font with a black outline.

# Conclusion...

---

- Given what we now know, the question is no longer whether online education is better or worse than classroom education.
- The question is not whether or not online has introduced incremental or transformative improvements in education even though I argue for the transformative view.
- The question is...

**How quickly can true innovation be introduced in higher education?**

# Conclusion...

---

## Subsidiary questions...

- Are we prepared to alter faculty review and faculty reward processes to be compatible with new forms of scholarship?
- Are we prepared to meet the growing expectation to deliver content via mobile and personal devices?
- Can we align faculty views of technology with student views?
- Are we, as educators, prepared to meet the challenges posed by the Internet and online education?

# Conclusion...

---

and...

Will innovation be in time to meet the huge demand for higher education?
