ABOUT THE SYMPOSIUM

This year marks the 7th Annual Tamkin Symposium. The Tamkin gift was bestowed by Dr. S. Jerome Tamkin and his wife Judith to support the University of California, Irvine School of Medicine Education Program. Thanks to this gift, we are able to dedicate this annual symposium to medical and health care issues presented by speakers who are distinguished in their field.

This year’s symposium, entitled “Bioterrorism and Community Disaster Preparedness”, will provide an update on the latest issues in bioterrorism and how infectious diseases could potentially become an epidemic. Other topics will include radiological and chemical terrorism and blast injuries. Through knowledge and understanding, community members can have an impact on being prepared for such a disaster.

Highly recognized physicians and community leaders in their areas of expertise will present various topics to help you better prepare in your own homes and community. You will have an opportunity to interact with the staff and ask questions during our panel discussions.
